DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 1- 19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Applicants' attention is to page 67 where an alkylene oxide without a polyfluoroolefin has fluctuation in potential for a photosensitive member and a polyfluoroolefin without an alkylene oxide the contact angle changes. The acrylic polymer containing, a polyfluoroolefin unit and an alkylene oxide unit should have a (R^F : R^O) note page 15 of 0.1 : 1 to 2 : 1 .
5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Both teach a surface layer for an electrophotographic member with either a fluoroalkyl group or a fluorine-containing resin particle.
